FULL-TIME EMPLOYEES (FTE)

Use FTE numbers where FTE stands for full-time employees or full-time equivalency. FTE can be computed by using total hours worked/2080 hours for a fiscal year. Estimate to the nearest tenth. If an employee works part time for more than one industry then determine FTE based on estimate of hours worked per industry.

Example: An employee worked 35% of their time on electric jobs, 30% on water jobs, 20% on sewer jobs and 15% on municipal nonutility jobs. The FTE by industry would be .4 for electric, .3 for water and .2 for sewer.

RETURN ON RATE BASE COMPUTATION

- 1. The data used in calculating rate base are averages.
- 2. Calculate those averages by summing the first-of-year and the end-of-year figures for each account and then dividing the sum by two.
- 3. Note: Do not include contributed plant in service, property held for future use, or construction work in progress with utility plant in service. These are not rate base components.

General footnotes

Acct 434: The City of Monroe waived \$93,215 of the 2005 property tax equivalent.

Balance Sheet End-of-Year Account Balances (Page F-19)

Please explain amounts in Accounts 143, 145 and/or 233 in excess of \$10,000, providing a short list or detail using other than terms such as "other revenues" "general" "miscellaneous" or repeating the account title.

Acct. 145 The year end balance is high because in 2004 the Utility purchased a new billing software. At year end, the storm water utility still owed their portion of the software. The Water Utility expects to collect this money in 2006. The Sewer Department also owed the Water Utility for their shared meter cost.

Acct. 22 The year end balance is higher than \$10,000 because as of December 31, 2005 the Utility owed the City for the October, November, and December 2005 employee benefits, postage, gas, and street patches.

HYDRANTS AND DISTRIBUTION SYSTEM VALVES

- 1. Distinguish between fire and flushing hydrants by lead size.
 - a. Fire hydrants normally have a lead size of 6 inches or greater.
 - b. Record as a flushing hydrant where the lead size is less than 6 inches or if pressure is inadequate to provide fire flow.
- 2. Explain all reported adjustments in the schedule footnotes.
- 3. Report fire hydrants as within or outside the municipal boundaries.

NR811.08(5) recommends that a schedule shall be adopted and followed for operating each system valve and hydrant at least once each two years. Please provide the number operated during the year.

Number of hydrants operated during year: 560

Number of distribution system valves end of year: 480

Number of distribution valves operated during year: 205

WATER OPERATING SECTION FOOTNOTES

Water Operation & Maintenance Expenses (Page W-05)

For values that represent an increase or a decrease when compared to the previous year of greater than 15%, but not less \$10,000, please explain.

Acct. 673 Maintenance of Mains increased by \$33,372 because there were more main breaks in 2005 than 2004. The Utility repaired several joint leaks along with gate valves that were leaking.

Acct. 923 Outside Services Employed decreased by \$18,386 because the Utility changed audtiors to save money. The Utility hired their auditing firm help file the rate increase application in 2004. The Utility didn't have this expense in 2005.

Water Mains (Page W-21)

Explain all reported Adjustments.

In the 2004 Annual Report, 14 feet of 6" main was incorrectly added as plastic pipe instead of metal pipe.

Water Services (Page W-22)

Explain all reported Adjustments.

An adjustment was made to the 2" services because the number was left out on the 2004 PSC Report.

If net additions are greater than zero, please explain financing by following criteria listed in schedule headnote No. 3.

In 2005 one new 3/4" copper service, 19 - 1" copper services, 2 - 1-1/2" copper services and 2 - 8" D.I. services were added. Bakersfield subdivision had 4 - 1" copper services put into service during 2005, these services were installed and contributed during the construction of Phase II in 2003. During 2005, Alpine Acres subdivision had 1 - 1" copper service put into service. This service was installed and contributed in 2003. Park Place subdivision had 2 - 1" copper services and 2 - 1-1/2" copper services placed into service during 2005. One - 1" copper service and 2 - 1-1/2" copper services were installed and contributed to the Utility in 1997. One - 1" copper service was installed and contributed to the Utility in 1999. Four - 1-1/2" copper services were put into service from the Twining Valley Development during 2005. These services were installed and contributed to the Utility in 2003. 8 - 1" copper services and 2 - 8" D.I. services were installed and paid for from operating funds by the Utility in 2005. One -3/4" copper service replaced an old 5/8" lead service. The new service was installed and paid for by the Utility from operating funds.

Meters (Page W-23)

Explain program for replacing or testing meters 1" or smaller.

The Utility has a 10 year maintenance program for meters 1" or smaller. During the 10 year period, the Utility replaces the customer's meter with a new meter and then the old meter is tested and repaired if necessary.

Ss. PSC 185.83(2) states "Station meters shall be maintained to ensure reasonable accuracy and shall have the accuracy checked at least once every 2 years." Are all station meters being tested every two years? Answer yes or no. If no, please explain.

Currently, the station meters are not tested every two years.

WATER OPERATING SECTION FOOTNOTES

Meters (Page W-23)

If 6-inch or larger meters in commercial, industrial or public authority classifications have not been tested, please explain.

The 6-inch meter in the system was not tested in 2005 because the Utility did not schedule it to be tested.
